

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	03-10-2026
Team ID	6ab4d8aca238dc999eb5c33f
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-8 people recommended

➔

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A **Team gathering**
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B **Set the goal**
Think about the problem you'll be focusing on solving in the brainstorming session.

C **Learn how to use the facilitation tools**
Use the Facilitation Superpowers to run a happy and productive session.

1

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Problem Statement (How Might We):

How might we import employee training data from a spreadsheet into ServiceNow using Transform Maps, link every record to an employee, pull employee details (like department) into the record, and secure it with role-based Access Control Lists?

Team gathering: Team members collaborate to share pre-work, set the goal and agree on the problem statement before ideation. Goal: a secure, accurate, easy-to-report employee training records table.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP

You can select a sticky note and hit the pencil icon to start drawing!

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Person 4

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mind.

Individual Brainstorm (ideas listed by each team member):

Team Member	Ideas
Member 1	Create a custom table u_employee_training_records with Training Name, Completion Date, Status and Employee fields Use Import Sets (Load Data) to upload the .xlsx file into a staging table Add Status choices: In Progress and Completed
Member 2	Build a Transform Map to map source fields to the target table fields Set Employee as a Reference field to sys_user for linking records Use dot-walking to show Employee.Department on the form and list
Member 3	Create a backup user and an HR Manager role Use role-based ACLs for read and write on the table Test access using Impersonate User

Grouped Ideas (themes):

Group (Theme)	Grouped Ideas
Data Structure	Custom table with required columns Status choice list Employee reference to sys_user
Data Import	Spreadsheet (.xlsx) upload via Load Data Staging table and Transform Map field mapping Run Transform to load data into target table
Data Linking & Reporting	Dot-walking to pull Department into the record Department visible in list view for easier reporting
Data Security	HR Manager role and backup user Application menu and module visible to role Read and Write ACLs, tested by impersonation

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Idea Prioritization (Importance vs Feasibility):

Idea	Importance	Feasibility	Priority
Create custom table with columns	High	High	Do first
Import spreadsheet data via Import Set	High	High	Do first
Transform Map for field mapping	High	High	Do first
Role-based ACLs (Read/Write) for HR Manager	High	Medium	Do next
Dot-walking to show Employee Department	Medium	High	Do next
Impersonate user testing	Medium	High	Do next
Application menu / module role restriction	Medium	Medium	Plan later
