

Ideation Phase

Empathize & Discover

Date	03-10-2026
Team ID	6ab4d8aca238dc999eb5c33f
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Empathy Map

Business Model **Toolbox**

Section	Points
Think & Feel	How can I load all training records quickly without typing each one? Will every record link to the correct employee? Worried that sensitive data may be seen by the wrong users Wants accurate data and easy reporting
Hear	Colleagues say Import Sets save a lot of time Manager says only HR should see training records Team says use Transform Maps and dot-walking for clean data
See	Training data scattered in spreadsheets Employee department missing in the training record Other users able to open the table without restriction
Say & Do	Creates the table and uploads the .xlsx file using Load Data Maps fields with a Transform Map and runs the transform Creates the HR Manager role, assigns it to a user and tests with Impersonate User
Pain	Manual data entry and errors Records not linked to employee details No control over who can read or edit data

Gain	Fast and accurate data import Employee department visible through dot-walking Secure role-based access using ACLs Easier reporting
-------------	---

Example: Food Ordering & Delivery Application

Empathy Map: Import Data using Transform Maps (ServiceNow)

User: ServiceNow Administrator / HR Manager managing employee training records.
