

Project Design Phase-II

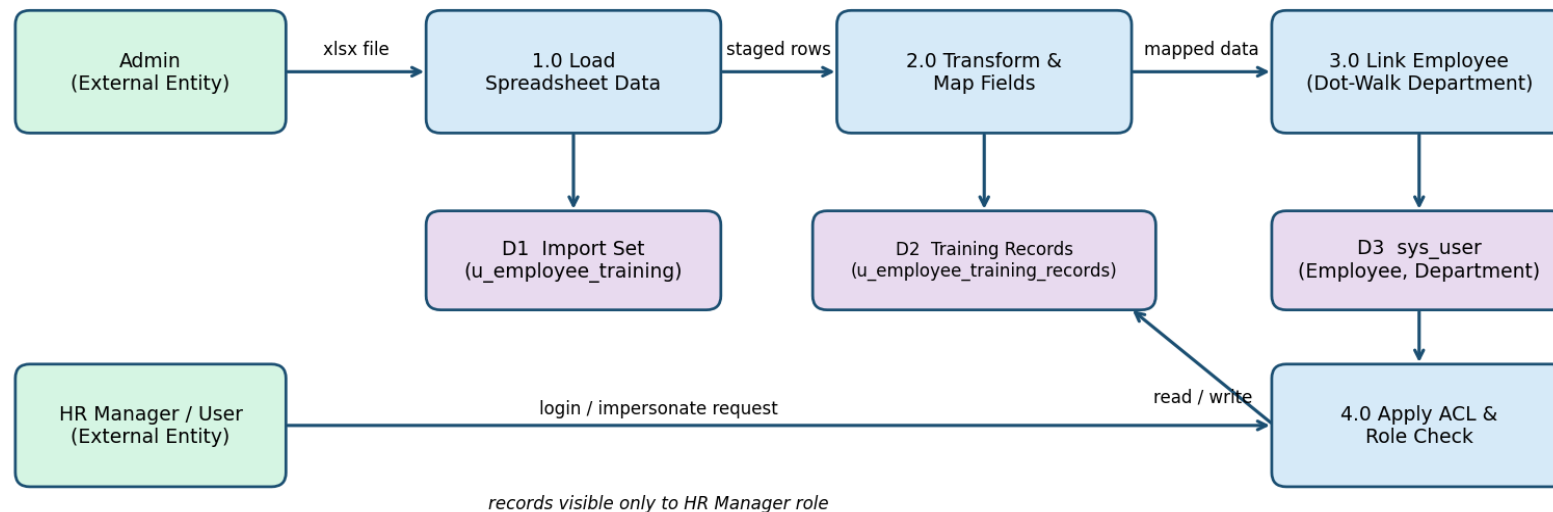

Data Flow Diagram & User Stories

Date	03 October 2026
Team ID	6ab4d8aca238dc999eb5c33f
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Level 0 – Import Data using Transform Maps (Spreadsheet)

User Stories

User stories for the product are listed below.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Table Creation	USN-1	As an administrator, I can create the Employee Training Records table with Training Name, Completion Date, Status and Employee fields.	Table is created and visible in the application menu	High	Sprint-1
Administrator	Table Creation	USN-2	As an administrator, I can add choices (In Progress, Completed) to the Status field.	Status shows a dropdown with the choices	Medium	Sprint-1
Administrator	Data Import	USN-3	As an administrator, I can upload a spreadsheet through Load Data into an import set table.	Import completes with state Complete and success code	High	Sprint-1
Administrator	Field Mapping	USN-4	As an administrator, I can create a Transform Map and map the 4 source fields to the target table fields.	Field maps (4) are saved against the target table	High	Sprint-1
Administrator	Field Mapping	USN-5	As an administrator, I can run Transform to load the staged data into the target table.	Transformation completes and records appear in the target table	High	Sprint-1
Administrator	Employee Linking	USN-6	As an administrator, I can dot-walk from Employee to Department on the form.	Department field is visible on the form and list view	Medium	Sprint-2
Administrator	Roles & Users	USN-7	As an administrator, I can create a backup user and the HR Manager role and assign the role to the user.	User shows HR Manager role as Active	High	Sprint-2
Administrator	Roles & Users	USN-8	As an administrator, I can add the HR Manager role to the application menu and module.	Menu and module are visible only to the role	Medium	Sprint-2
Administrator	Access Control	USN-9	As an administrator, I can elevate to security_admin and create Read and Write ACLs for the table with the HR Manager role.	Two ACLs (read, write) are active	High	Sprint-2
HR Manager (backup user)	Access Control	USN-10	As an HR Manager, I can view and edit Employee Training Records.	Records open and fields are editable	High	Sprint-3
Other User (no role)	Access Control	USN-11	As a user without the HR Manager role, I cannot see the Employee Training Records table.	Table and records are not accessible	High	Sprint-3

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Testing	USN-12	As an administrator, I can impersonate users to verify the access rules.	Results match the role permissions	Medium	Sprint-3
