

Customer Journey Map

Team ID: 6ab4d8aca238dc999eb5c33f | Project: Import Data using Transform Maps (Spreadsheet) | Date: 03 October 2026

Scenario: Importing, linking and securing employee training records in ServiceNow (Persona: Administrator / HR Manager)

	Entice How does someone become aware?	Enter What do people experience as they begin?	Engage In the core moments, what happens?	Exit What happens as the process finishes?	Extend What happens after the experience?
Steps	Need to store employee training data in one place Prepares spreadsheet with 4 fields	Creates the Employee Training Records table Uploads spreadsheet via Load Data	Creates Transform Map and runs Transform Dot-walks Employee Department Creates user, HR Manager role and ACLs	Impersonates HR Manager and other user to test Views and edits records	Records available for reporting Roles/ACLs reused for new data
Interactions	Spreadsheet (Google Sheets / Excel) ServiceNow login	ServiceNow: Tables, System Import Sets	Transform Maps, Form Layout, Users, Roles, ACL screens	Impersonate User menu Employee Training Records list and form	List view and reports Application menu
Goals & motivations	Help me keep training records organised	Help me load data without typing each record	Help me link each record to an employee and department Help me restrict who can see the data	Help me confirm only the right people have access	Help me report training status easily
Positive moments	Data already available in spreadsheet	Import completes with success message	Department appears automatically in the record	HR Manager can see and edit records Others cannot see the table	Secure, reusable setup
Negative moments	Data may have missing or wrong fields	Field names must match the table	Many steps: transform map, roles and ACL	Access issue if role or ACL is missed	Manual upload needed for every new file
Areas of opportunity	Validate spreadsheet before upload	Use a ready spreadsheet template	Automate import with scheduled imports	Add test cases for each role	Create dashboards for training status
