

Project Design Phase-II
Data Flow Diagram & User Stories

Date	03 October 2026
Team ID	6ab4d8aca238dc999eb5c33f
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

DFD Level 0:

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Table Creation	USN-1	As an administrator, I can create the Employee Training Records table with Training Name, Completion Date, Status and Employee fields.	Table is created and visible in the application menu	High	Sprint-1
Administrator	Table Creation	USN-2	As an administrator, I can add choices (In Progress, Completed) to the Status field.	Status shows a dropdown with the choices	Medium	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Administrator	Data Import	USN-3	As an administrator, I can upload a spreadsheet through Load Data into an import set table.	Import completes with state Complete and success code	High	Sprint-1
Administrator	Field Mapping	USN-4	As an administrator, I can create a Transform Map and map the four source fields to the target table fields.	Four field maps are saved against the target table	High	Sprint-1
Administrator	Field Mapping	USN-5	As an administrator, I can run Transform to load the staged data into the target table.	Transformation completes and records appear in the target table	High	Sprint-1
Administrator	Employee Linking	USN-6	As an administrator, I can dot-walk from Employee to Department on the form.	Department is visible on the form and list view	Medium	Sprint-2
Administrator	Roles & Users	USN-7	As an administrator, I can create a backup user and the HR Manager role and assign the role to the user.	User shows the HR Manager role as Active	High	Sprint-2
Administrator	Roles & Users	USN-8	As an administrator, I can add the HR Manager role to the application menu and module.	Menu and module are visible only to the role	Medium	Sprint-2
Administrator	Access Control	USN-9	As an administrator, I can elevate to security_admin and create Read and Write ACLs for the table with the HR Manager role.	Two ACLs (read, write) are active	High	Sprint-2
HR Manager (backup user)	Access Control	USN-10	As an HR Manager, I can view and edit Employee Training Records.	Records open and fields are editable	High	Sprint-3

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Other User (no role)	Access Control	USN-11	As a user without the HR Manager role, I cannot see the Employee Training Records table.	Table and records are not accessible	High	Sprint-3
Administrator	Testing	USN-12	As an administrator, I can impersonate users to verify the access rules.	Results match the role permissions	Medium	Sprint-3
