

Project Development Phase

Performance Test

Field	Details
Date	03 October 2026
Team ID	6ab4d8aca238dc999eb5c33f
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	Not specified in template

Model Performance Testing

This project is built on ServiceNow and does not use Tableau or a machine-learning model. The performance test parameters are therefore filled with the matching ServiceNow measures.

S.No.	Parameter	Screenshot / Values
1	Data Rendered	Employee Training Records list showing all imported rows Four columns: Training Name, Completion Date, Status, Employee
2	Data Preprocessing	Spreadsheet arranged into four columns matching target fields Transform Map maps each source column to its target field
3	Utilization of Filters	List filter on Status (In Progress / Completed) Access filter by HR Manager role through ACLs
4	Calculation Fields Used	Dot-walked field Employee.Department on the form No other calculated fields were used
5	Dashboard Design	No of Visualizations / Graphs - 0 (no dashboard was built in this project)
6	Story Design	No of Visualizations / Graphs - 0 (no story was built in this project)

Output Figures

Employee Training Records: list view (after Transform)			
Training Name	Completion Date	Status	Employee
Data Security Basics	2026-08-12	Completed	Employee 1
Workplace Safety	2026-09-03	Completed	Employee 2
Leadership Essentials		In Progress	Employee 3
Cyber Awareness	2026-09-10	Completed	Employee 4
Team Communication		In Progress	Employee 5

5 records loaded from the spreadsheet (sample data)

Illustration prepared from the project data

Figure 1: Data rendered - list view of imported records (illustration)

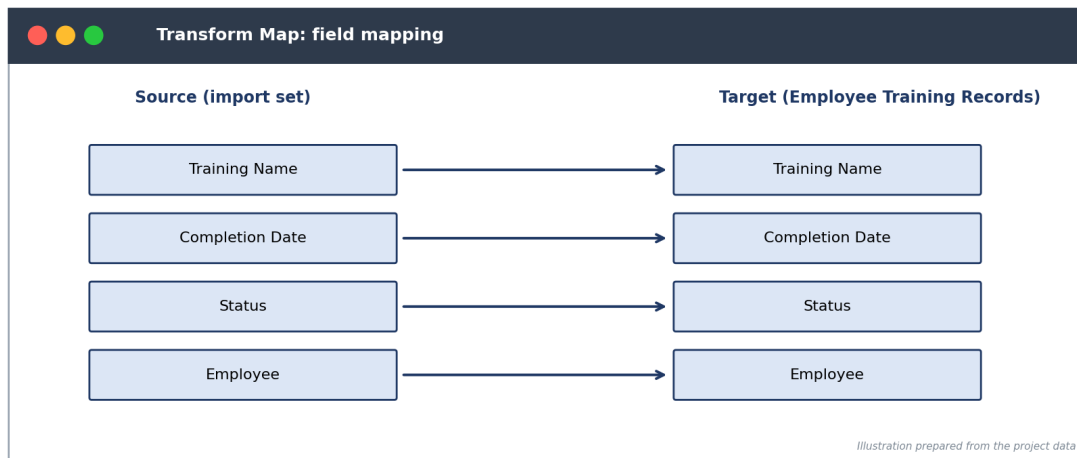

Figure 2: Data preprocessing - Transform Map field mapping (illustration)

The interface shows a filter 'Status = Completed' at the top. Below it is a table with four columns: 'Training Name', 'Completion Date', 'Status', and 'Employee'. The table contains three rows of data, all with 'Completed' status. A small text at the bottom right reads 'Illustration prepared from the project data'.

Training Name	Completion Date	Status	Employee
Data Security Basics	2026-08-12	Completed	Employee 1
Workplace Safety	2026-09-03	Completed	Employee 2
Cyber Awareness	2026-09-10	Completed	Employee 4

Figure 3: Utilization of filters - Status is Completed (illustration)

Import Performance Summary

Measure	Result
Upload method	Single Load Data action
Transform runs	One Transform run for all staged rows
Record count check	Spreadsheet rows equal records in target table
Form load with dot-walked Department	Opens normally
