Project Overview

- **Project Name:** Import Data using Transform Maps (Spreadsheet)
- **Project Description:** A ServiceNow solution that imports employee training records from a spreadsheet through Load Data and a Transform Map into the Employee Training Records table, links each record to an employee with Department dot-walking, and restricts access with an HR Manager role and Read / Write ACLs.
- **Project Version:** 1.0
- **Testing Period:** 28 September 2026 to 03 October 2026

Testing Scope

Features and functionalities tested:

- Employee Training Records table with four fields and Status choices
- Spreadsheet upload through Load Data
- Transform Map field mapping and Transform run
- Employee reference and Department dot-walk
- HR Manager role, application menu and module
- Read and Write ACLs and impersonation checks

User stories tested: USN-1 to USN-12 (Sprint-1, Sprint-2 and Sprint-3).

Testing Environment

- **URL / Location:** ServiceNow instance (web browser)
- **Credentials:** Administrator and HR Manager test accounts on the instance (not recorded in this report)
