

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	03 October 2026
Team ID	6ab4d8aca238dc999eb5c33f
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Table Creation	Create Employee Training Records table Add fields: Training Name, Completion Date, Status, Employee Add Status choices (In Progress, Completed)
FR-2	Data Import	Prepare spreadsheet (.xlsx) with four fields Load data through System Import Sets > Load Data
FR-3	Field Mapping (Transform Map)	Create Transform Map from import set to target table Map source fields to target fields and run Transform
FR-4	Employee Department Linking	Dot-walk Employee to Department in form layout Show Department in form and list view
FR-5	Roles & User Management	Create backup user and HR Manager role Assign role to user and to application menu / module
FR-6	Access Control (ACL)	Elevate role to security_admin Create Read and Write ACLs for HR Manager role Test access by impersonating users

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple forms and list views; Department is auto-displayed from the selected Employee.
NFR-2	Security	Role-based access with Read and Write ACLs; only the HR Manager role can view and edit records; other users cannot see the table.
NFR-3	Reliability	Import and transform run with logged results (state Complete, success code), so data is mapped accurately to the correct fields.
NFR-4	Performance	Spreadsheet rows are loaded and transformed in bulk; records open quickly in the list view.
NFR-5	Availability	Hosted on the ServiceNow cloud instance and accessible through a browser at any time.
NFR-6	Scalability	More records, users and roles can be added with the same staging table, transform map and ACL setup.
